Plans Display
Route 2027 Bridge over Interstate 70 at Speers Interchange
Speers Borough, Washington County

Uniontown, PA – The Pennsylvania Department of Transportation (PennDOT) will conduct a plan display to inform the public of the proposed project for replacing the bridge on Route 2027 (Maple Drive) that spans Interstate 70 (I-70) in Speers Borough, Washington County. The existing bridge, located at the Speers Interchange, has a vertical clearance over I-70 of just 14.3 feet, which has resulted in the existing structure being periodically hit by taller vehicles. The new bridge will improve this vertical clearance by about two (2) feet which will require adjustments to Route 2027 approach roadways as well as Guttman Avenue and the eastbound on/off interchange ramps. The new bridge will also be wider as it will add a southbound left turn lane for traffic making the left onto the eastbound on ramp.

The purpose of this meeting is to present the proposed plans and potential alternatives for maintaining traffic during construction. PennDOT representatives, along with design consultants, will be available to answer questions and gather input regarding the project.

Date: Wednesday February 13, 2019
Time: 5:00 PM to 6:30 PM
Location: Mon Valley Career & Technology Center
5 Guttman Avenue
Charleroi, PA 15022

The plans display location is ADA accessible and any person requiring special assistance is asked to contact the Pennsylvania Department of Transportation prior to the meeting. If you require additional information concerning this meeting, please contact Mr. Barry V. Lyons, Project Manager, at 724-439-7336 prior to the Plans Display Meeting.
